Summary

Former Business Manager with an absolute love for coding.

Aspiring Full-Stack Web Dev with a very strong commitment in learning and curiosity about the interactions of different parts of software with one-another. I take great care in any of my works to make it responsive in design and achieve the highest score possible in Google's Lighthouse.

Tech I use:

Frontend:

- HTML 5
- CSS 3
- SCSS
- Javascript
- Redux
- React
- Nextjs
- Tailwind

Backend:

- Nodejs (Express)
- Cloudinary
- Strapi CMS

O.S:

- Pop Os linux (preferred)
- Windows 10

Code Editor:

- VSCode

Experience

Freelancing Web Developer (06/2020 – present)

Some of my projects:

- **Dardha.al** is a simple e-shop for purchasing fruits and veggies. I created this project for a client of mine using (Nextjs, Tailwind, Strapi CMS, Snipcart, Mongo DB and Cloudinary)

You can visit its website at <https://www.dardha.al/>

- **My Notes** is a note editing app I created from scratch using React, Redux slices and thunks and Tailwind, with a Mongo DB database and Nodejs (express) as server. I used Mongo instead of storing a local file in order to persist the notes and access them from PC and mobile with the same account.

You can find this app here: <https://notes-app-roan.vercel.app/login>

Languages I know

- Albanian (native)
- English (professional)
- Italian (average)
- Turkish (average)

Education

Empire State College New York (Bachelor in Management) - 2011
